I. INTRODUCTION

25X1D This report presents the results of an extensive search of [redacted] photography by a joint Army, Navy, CIA photographic intelligence team, in an effort to confirm or deny the existence of alleged guided missile launch sites in the European Satellites. This search has been based on a 25X1D comprehensive review of reports [redacted] which concern a total of approximately 456 alleged missile sites.

II. SUMMARY

No positive photographic evidence of guided missile launch sites 25X1 was derived from [redacted] photography of the European Satellites. However, it must be noted that: (1) only about 30 percent of the area occupied by the Satellite countries is covered by adequate [redacted] photography; (2) of the approximately 456 alleged missile launch sites, only 139 locations are covered by adequate [redacted] photography; and (3) most of the reports of guided missile activity in the Satellites are based on information later than the date of the [redacted] photography. The following tabulation summarizes data on coverage and alleged sites.

25X1 25X1 25X1

[redacted] 25X

III. ALLEGED SITES BY COUNTRY

The remainder of this report gives locations for the alleged sites covered by [redacted] photography, together with data on the photo cover.
